Description

Honey, and particularly thyme honey, is one of the most healthy and nutritious food.

It is one of the few foods which do not go bad in the passage of time.

It gives energy and helps prolong life and this is how the longevity of many beekeepers is explained.

Pure and fresh thyme honey has a tendency to become crystallized.

This shouldn't worry you, since it is a sign of excellent quality and it can easily be restored to its original condition , placing it in bain-marie.
